

Facebook Like Chat Script For vBulletin

Article Number: 617 | Rating: 4/5 from 2 votes | Last Updated: Sat, Oct 19, 2013 at 1:18 PM

Cometchat 1.6 is a **Facebook like chat script** that fully integrates into vBulletin. Once a user logs in to you forum he will be automatically logged into the chat. CometChat is an in-page Facebook style footer PHP chat which enables your users to interact with each other in real-time. It allows you to display a chat-box toolbar on the bottom of your website, just like Facebook.

CometChat works with all modern browsers including Internet Explorer 6+, Mozilla Firefox 1.5+, Safari, Opera 9+. Requires no browser plugins like Java™ or Adobe Flash Player™. CometChat does not require any special servers. It works on regular servers as well as shared hosts. No need to manage your own server. CometChat uses industry standard PHP and mySQL for communication. No extra server side modules required.

CometChat integrates seamlessly with many social networking, dating, CMS softwares including Joomla, JomSocial, vBulletin etc. CometChat's new plugin architecture enables you to create and expand functionality of CometChat. Your CometChat packages comes with 5 pre-loaded plugins.

No special hardware or software required. CometChat runs on standard shared servers. Only PHP + mySQL required. Simple and easy to install.
