

What is VH/VW (viewport height/ viewport width) in CSS?

1061 Administrator Fri, Jun 3, 2022 [CSS](#) 0 1542

It is a CSS unit used to measure the height and width in percentage with respect to the viewport. It is used mainly in responsive design techniques. The measure VH is equal to 1/100 of the height of the viewport. If the height of the browser is 1000px, 1vh is equal to 10px. Similarly, if the width is 1000px, then 1vw is equal to 10px.
