

ProFolio - Instantly Create Free Portfolio Website

175 Administrator Mon, Jan 4, 2010 [Web Development](#) 0 5172

ProFolio is a free & ready-to-go script for **creating portfolio websites** easily. The portfolio script is very ideal for presenting the portfolio of artists, designers, photographers, or anyone who needs to display their work with style.

ProFolio is built with PHP & MySQL and it comes with a web-based installer. You can create categories & upload images (works) under these categories (auto resize support). They will be displayed as an image gallery in your portfolio. Also, you can update your about & contact pages via the admin interface.

For customizing the look & feel of the portfolio website, check the customization options of ProFolio.

Requirements: PHP, MySQL
