jCart - Free PHP AJAX Shopping Cart

177 Administrator Wed, Jan 20, 2010 Web Development 0 6426

jCart is a very simple & **free shopping cart script** that is built with **PHP** & **jQuery**. It offers a base Ajaxed basket interface that can be improved further by implementing the checkout pages.

The shopping cart script is unobtrusive, generates valid XHTML & design of it can be customized easily via CSS. jCart's inputs are validated on the server-side for a better security. There is a step by step installation guide & how-to provided that can be found here.

Requirements: PHP 5.2+

Compatibility: All Major Browsers
