

Tiny Flash MP3 Audio Player

185 Administrator Wed, Jan 6, 2010 [Web Development](#) 0 4031

Audio Player is a tiny yet beautiful **Free Flash MP3 Player** that is used on many popular websites like Talkcrunch. It is originally a Wordpress plugin but with the increasing popularity, the developer of the player, Martin Laine, has created a [standalone version](#) as well. The Wordpress plugin can directly use the Wordpress media library which is great.

The standalone version can be configured very easily too & they both have various features like:

- Autostart
- Loop
- Animation
- Remaining time
- Volume control & more.

Online Demo

Audio Player is open source & source files can be found [here](#).
