

Google Maps jQuery Plugin

190 Administrator Thu, Jan 7, 2010 [Web Development](#) 0 4101

The **Google Maps jQuery Plugin** lets you simply embed Google Maps using The **Google Maps JavaScript API** in your web pages. While you can use the original Google Maps JavaScript API to do what you need. This plugin attempts to simplify the process to adding maps to a page. To use The Google Maps JavaScript API, you need to first sign up for an API key.

The **Google Maps jQuery Plugin** is less than 10KB of JavaScript. Portions of the Map (div container, info window) is controlled through CSS, so a user can create their own styles. It has been tested on Firefox 3, Internet Explorer 8, Safari 4.

Requirements: Firefox 3, Internet Explorer 8, Safari 4

License: GPL License
