# jqPlot - jQuery Charts & Plotting Plugin

205 Administrator Sat, Jan 9, 2010 [Web Development](#)   0 4231

jqPlot is a **jQuery plotting plugin** which can generate very good looking **line and bar charts**.

The plugin offers various features like:

- Different chart style options
- Ability to rotate axis text & customize date axes
- Tooltips, data point highlighting & more

jqPlot itself has a plugin support too and it be extended with new chart types & options. Almost every aspect of the **charts** created can be controlled like the background of the grid, show/hide ticks, font sizes/types & much more.

The plugin is very well-documented & provides very nice examples.

Requirements: jQuery

Compatibility: All Major Browsers
