

# jQuery MultiSelect Plugin with ThemeRoller Support

284 Administrator Thu, Feb 4, 2010 [Web Development](#) 0 6559

This jQuery Multi-Select Plugin turns an ordinary HTML select control into an elegant drop down list of check-boxes. **jQuery Multi Select Plugin** was intended to re-factor Cory LaViska's MultiSelect implementation, but it quickly turned into a complete re-write with a focus on speed and ThemeRoller support.

**jQuery MultiSelect Plugin** is compatible with jQuery 1.4.0+ and all themes from jQuery UI 1.7+. It is known to work in all commonly used web browsers such as Firefox 2+, IE 6+, Chrome Beta/4, Safari 4 and Opera 10.

Requirements: jQuery Framework
