

jDigiClock - HTC Hero Style jQuery Digital Clock

319 Administrator Tue, Feb 16, 2010 [Web Development](#) 0 4467

jDigiClock is a jQuery weather clock plugin inspired by **HTC Hero Clock** Widget. To use the jDigiClock plugin, simply include the jQuery library, the jDigiClock source file and jDigiClock core stylesheet file inside the tag of your HTML document. **jDigiClock** accepts a lot of configuration options, e.g. Clock images path, Weather images path, Set AM/PM option, Weather location code, Set weather metric mode: C or F, Weather update in minutes.
