

Speech Bubbles With Pure CSS3

382 Administrator Fri, Mar 12, 2010 [Web Development](#) 0 3934

Nicolas Gallagher is sharing a creative way on creating good-looking **speech bubbles** with **CSS3**. There are no images or JavaScript in the implementations but uses the :before and/or :after pseudo-elements to produce basic shapes.

Design is directed toward human beings. To design is to solve human problems by identifying them and executing the best solution.

Ivan Chermayeff

It's not what you look at that matters, it's what you see.

Henry David Thoreau

This is a blockquote that is styled to look like a thought bubble

This is a blockquote that is styled to look like a speech bubble

The HTML remains semantic however we should remember that CSS3 is not fully supported by all major browsers & we may again require JavaScript to add this support (like IE7.js).

Compatibility: Web Browsers With CSS3 Support
