

How to prevent access to a specific file on server using htaccess?

387 Administrator Sun, Mar 14, 2010 [Web Development](#) 0 3955

If you want to block with the file name abc.jpg, the followig htaccess code will prevent the viewing of this file.

```
# prevent access of a certain file
```

```
order allow,deny  
deny from all
```

Put this code in your .htaccess file.
