

## How to restrict access to your .htaccess file?

388 Administrator Sun, Mar 14, 2010 [Web Development](#) 0 3800

By adding the following code to your htaccess file will prevent hacker's attempt to access your htaccess file. It will display a 403 error message on their browser if they try to access .htaccess file.

```
# secure htaccess file
```

```
order allow,deny  
deny from all
```
