

How to redirect an old domain to a new domain using htaccess?

393 Administrator Sun, Mar 14, 2010 [Web Development](#) 0 3695

You can redirect an old domain name to the new domain using htaccess file. This uses the 301 redirection that is SEO friendly.

```
# redirect from old domain to new domain  
  
RewriteEngine On  
RewriteRule ^(.*)$ http://www.yourdomain.com/$1 [R=301,L]
```

Put this code in your .htaccess file to redirect an old domain name to new domain name.
