New Cisco Linksys Wireless Routers

Cisco unveiled a new line of **Linksys wireless routers**, designed to let its core audience of tech experts and enthusiasts take their home networking experience to the next level.

With the addition of the new **Cisco Connect software**, the new Linksys E-Series is designed to make it easier for users to customize and control their wireless network settings to match their preferences. With a quick and easy setup, the software auto-assigns the WPA security passkey and SSID. Once configured, users can use Cisco Connect to easily manage their wireless home network by:

- Adding multiple Internet-capable devices to the network
- Setting parental controls for each computer or device
- Giving visitors password-protected Internet access on a separate guest network
- Customizing advanced settings and changing the network SSID and password.
- For the advanced user, Linksys' advanced features are still available through the default IP address (192.168.1.1).

New Linksys Wireless Routers - Product Descriptions and Pricing

Linksys E1000 Wireless-N Router ($79.99)

- Wirelessly connects computers and other devices at transfer speeds up to 300 Mbps
- Uses four Fast Ethernet (10/100 Mbps) ports to directly connect wired devices
- Ideal for general wireless Internet usage and home office productivity.

Linksys E2000 Advanced Wireless-N Router ($119.99)

- Includes four Gigabit Ethernet (10/100/1000 Mbps) ports for faster file sharing with other Gigabit-enabled devices, including computers, hard drives, and servers
- Features selectable dual-band (2.4 GHz or 5 GHz) technology to help avoid interference, allowing for smoother file transfers and media streaming
- Ideal for connecting computers, gaming consoles, Internet-enabled HDTVs and Blu-Ray players, and other wireless devices at transfer speeds up to 300 Mbps.

Linksys E2100L Advanced Wireless-N Router with Linux OS ($119.99)

- Utilizes the Linux operating system for flexibility to customize the network
- Uses four Fast Ethernet (10/100 Mbps) ports to directly connect wired devices
- Built-in UPnP AV Media Server streams entertainment content to an Xbox 360, PS3 or other compatible device
- USB port provides connectivity to storage devices for file sharing at home or over the Internet.

Linksys E3000 High-Performance Wireless-N Router (Dual-Band) ($179.99)

- Features simultaneous dual-band (2.4 GHz and 5 GHz), high-performance Wireless-N technology for smoother HD video streaming, wireless gaming and file transfers
- Includes four Gigabit Ethernet (10/100/1000 Mbps) ports for faster file sharing with other USB port and provides connectivity to storage devices for file sharing at home or over the Internet
- Built-in UPnP AV media server enables streaming of entertainment content to an Xbox 360, PS3 or other compatible device
- Optimized for entertainment, ideal for connecting computers, gaming consoles, Internet-enabled HDTVs and Blu-Ray players, and other wireless devices at transfer speeds up to 300 Mbps.

Linksys AE1000 High-Performance Wireless-N USB Adapter ($69.99)

- Provides Wireless-N capability to Windows desktop computers and laptops
- Selectable dual-band wireless-N - connects to either a 2.4 GHz or 5 GHz wireless network
- Includes USB extension cable and adapter base for improved wireless connectivity - ideal for hard-to-reach USB ports
- Helps avoid wireless freeloaders and Internet threats using customizable security settings, including WPA/WPA2 Personal and WPA/WPA2 Enterprise.
