

# Flash Webcam Image Capture

44 Administrator Thu, Nov 12, 2009 [Software](#), [Web Development](#) 0 6228

Photo Booth is a tiny open source **Flash application** that can **capture images from a webcam**. The script is built with AS3 + PHP5 and can be instantly implemented to any website. The project is now open source.

It can be a great add-on when asking users to upload an avatar or creating a web application around photos. To see how it works, a demo can be found [here](#).
