

Apple iPad Price in India

478 Administrator Tue, Sep 7, 2010 [Apple / Mac](#) 1 3162

Recently Apple launched its new tablet PC called iPad in India. The **Apple iPad** is available in 2 models at very high price in India. The Apple iPad with only Wi-Fi is available at a price of 28,000 Rupees and the Apple iPad with 3G and WiFi is available at a **price** of 42,500 Rupees **in India**. When compared with other countries, **Apple iPad price** is very high in **India**.

Apple iPad Features

Apple iPad is complete internet oriented device that can run on Wi-Fi and 3G. You can watch movies; hear music, browser photos and run games if a connection is not available. The real power of iPad comes into play when it's connected to internet.

There is email and social networking, streaming, navigation using Google maps plus unlimited possibilities from millions of applications designed for iPad OS. There is a new

app called iBook that can be used to download and read eBooks like in Amazon Kindle.

Multi-touch and accelerometer sensor enables the smooth operation of device features. iPad offers battery backup of around 10 hours. Interface of the iPad software interface looks like a combination of that in iPhone and Mac OS. Interface is customizable as per user requirements.
