

# High-Speed Internet Data Card and USB Modem

489 Administrator Mon, May 3, 2010 [Wireless Networking](#) 0 2539

Most of the laptop users are always in need of a wireless internet connection to connect to the internet and always stay in touch. New laptops already have Wi-Fi support in them but Wi-Fi internet access is not available at all places, especially when you are travelling. That is the time when you look for a wireless data-card or USB modem to get connected online while travelling.

Data-cards are used with notebook computers to provide mobile wireless Internet access. Some of the popular wireless internet service providers in India through data card USB modem are:

- BSNL Data Card
- Reliance NetConnect Data Card
- Airtel Data Card
- Tata Indicom Photon Data Card
