Syncing Email Accounts to iPhone You can use iTunes to sync your email accounts to your iPhone. iTunes supports Mail and Microsoft Entourage on a Mac, and Microsoft Outlook and Outlook Express on a PC.

Note: Syncing an email account to iPhone copies the email account setup, not the messages themselves. Whether the messages in your inbox appear on both iPhone and your computer depends on the type of email account you have and how it's configured. Account settings are only transferred from your computer to iPhone. Changes you make to an email account on your iPhone do not affect the account on your computer. email
