FAQ: Which searches are considered full-text searches?

530 Administrator Mon, Jun 14, 2010 [Document Management](#)   0 2497

8.5 indexes the document content and all of the associated profile metadata from Custom 1 through Custom 30. This also includes date and Boolean fields. Any search which includes criteria in the full-text search file will effectively trigger a search against the full-text index for the keyword search terms as well as the profile criteria.
