Maruti Suzuki is expected to introduce the diesel version of its leading sedan the Maruti Suzuki SX4. The diesel SX4 will have the same design, style, exterior, and the interiors but a new engine. Maruti has plans to introduce the Fiat 1.3-litre multijet engine in the SX4 Diesel. The same engine is doing wonders in the Swift and Swift Dzire. The car will also be fitted with a Variable-Geometry Turbo (VGT) that will further increase the power of the car by 10 bhp.
