

## Can I add PHP code for execution in article body?

594 Administrator Sat, Aug 17, 2013 [Arts and Entertainment](#) 0 5122

This is an example of how to let your PHP scripts run within an IFRAME tag in the article content. PHPKB knowledge base software allows you to do everything you need in your articles. See an example of calling the PHP script to execute the phpinfo() function below.

### PHP Code Execution Results

If you can see this, your browser doesn't understand IFRAME.
