

Facebook Style Chat Script - ArrowChat

615 Administrator Wed, Dec 23, 2015 [Web Development](#) 0 4569

Are you looking for a facebook chat script clone? ArrowChat is a **jQuery based chat software** that uses PHP and MySQL. It is placed at the bottom of your website similar to **Facebook Chat script** . The script is fully customizable from within the administration panel. Customers of ArrowChat are also able to buy or sell modifications, themes, and plugins for the software from our built-in store.

ArrowChat Features

- Applications - Create an applications menu with either links or full pop out applications. Additional applications can be created with ease or downloaded from our store.
- Site Notifications - Users can get notifications from your site such as friend requests, new messages, and more.
- Search Online Friends - If your user has more online friends than a number that you specify, the search box will appear.
- Animations - Customize your ArrowChat with optional animations such as slideIn, slideDown, fadeIn, fadeOut, and bounce.
- Idle Users - ArrowChat will show when a user is idle
- Hide Chat - Users can hide and show their chat with this button.
- User is typing - ArrowChat will show when a user is typing.
