

Admin Skins - Constellation Complete Admin Skin

625 Administrator Fri, Aug 13, 2010 [Web Development](#) 0 4547

Constellation is a powerfull **admin skin** for building advanced backends, both for desktop and mobile users. It provides a wide range of styles from data visualization to lists and calendars, all fluid and nestable. This skin is build on HTML5 and CSS3 , and is powered by jQuery for maximum user experience.

Features

- HTML5 & CSS3 markup
- Fluid or fixed layout, based on 960 grid system
- 40+ elements styles, with multiple variations
- jQuery powered, fully functional even if JS is disabled
- Satellite backend pages are provided: login, error with report sending, 404's...
- Mobile version included – for iPhone, Android and all webkit-based mobile browsers – compatible with main template content styles
- All elements are fluid (sizes are in EMs): resize just by adding a class
- Detailed documentation with complete styles and functions references
- 2 background colors : light and dark

Pages included in the package

- Main page with examples of all included styles:
 - Favorites list
