Samsung SMART TV Price in India

Samsung Smart TV price in India ranges from Rs. 58,000 to Rs. 4,50,000 depending on the set of features and screen size.

What is Smart TV?

Smart TV, which is also called “Connected TV” at times, is the name used to describe the combination of the internet and Web features into the new television sets and set-top boxes, and the union of technology between computers and these television sets/set-top boxes.

How is Smart TV better than regular TV?

Smart TV's are interactive in nature; they offer better connectivity and computing ability than the regular television set. These devices allow viewers to search and find videos, movies, photos and other content on the web, TV channels or on a hard drive. You can also install and run applications or plug-ins based on a specific platform.

Samsung Smart TV Technology

The new line of **full HD Smart TVs** in India with ultra clear panel and digital noise filter from Samsung offers features like the Smart Hub which lets you surf the web and download various applications and search for TV content while watching live TV. You can also surf the net on your TV, there is a dedicated web browser in the Smart TV which lets you search for content, shop for apps and stay connected via social networking sites.

Samsung's Social TV feature allows you to blog and chat through sites and services like Facebook, Twitter, and Google Talk while watching live TV although the availability of Social TV depends on the region. Then there is Skype for free video calls with other Skype users, a video on demand service and All Share for wirelessly connecting with mobile devices through DLNA (Digital Living Network Alliance) technology for sharing movies, photos and music stored on them.

There is also 2D to 3D conversion available in the 3D Smart TVs with 3D sound with the help of Samsung's Depth Rendering Technology. The 3D glasses are also better designed and lighter. Then there is Samsung's clear motion rate. Unlike the refresh rate which explains a part of picture quality, Clear Motion Rate determines the motion of an image by using three factors: chip set, TV panel, and backlight. There are 4 HDMI ports and 3 USB ports available in the television sets.
